INEOS GRENAIER

# ABOUT US

As experts in special conversions and offroad accessories, we have included the INEOS Grenadier in our product portfolio and equipped it with our high-quality accessories, making it more functional for every terrain.

The identity of LeTech is always reflected in our work. This is characterized by three unique selling propositions:

**Made in Germany:** At LeTech, we place a particularly high value on quality. We manufacture our products in our own factory in Welzheim using modern technology and Swabian thoroughness.

**Certified:** Competence with letter, seal and certificate: Since 2016, our company LeTech GmbH & Co. KG has been certified in accordance with the ISO 9001:2015 quality management standard.

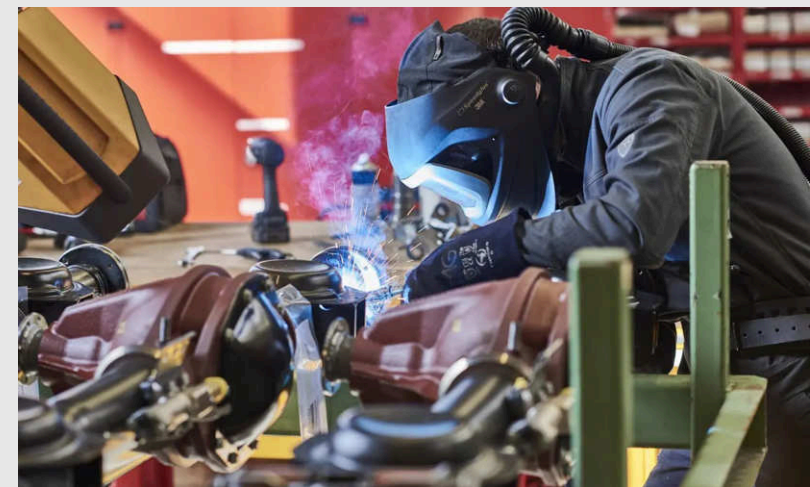

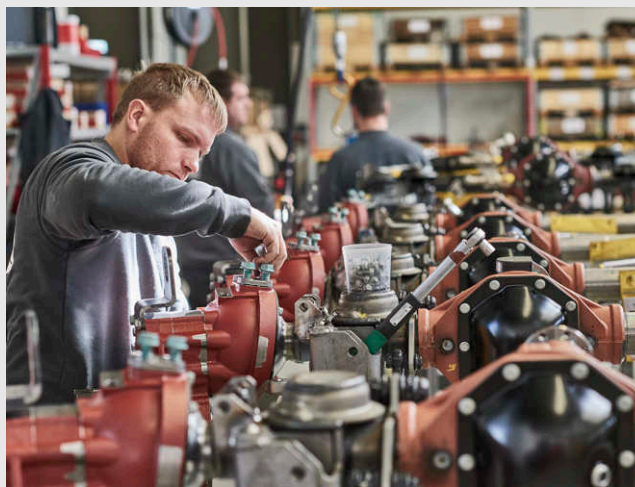

For all three areas of competence:

- Development, production and distribution of vehicle components
- Construction of special vehicles
- Repair and maintenance

**Family business since 2009:** For us, family business means maintaining a certain corporate culture in which not only employees, but also customers and business partners have become good friends and therefore part of the LeTech family. Short decision-making processes enable us to quickly arrive at the best possible solution.

# UPGRADE YOUR GRENADIER

# LETECH ROOF RACK

The LeTech roof rack offers an elegant solution for transporting heavy roof loads as well as easy installation of roof tents and awnings. The four C-rails of the LeTech roof rack offer individual mounting options and allow flexible width adjustment by projecting over the side rails.

The dimensions of the LeTech roof rack are 210cm x 170cm (L x W).

LeTech also offers a range of additional accessories such as the axe holder, shovel holder, sand plate

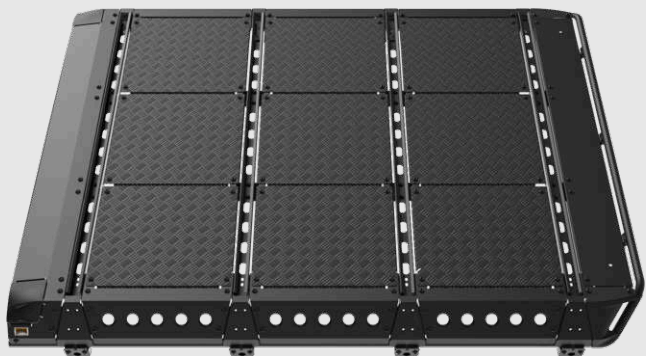

holder and various mounting kits. As an option, two LED multi-chamber work lights can also be integrated, which are attached to the rear of the roof rack and have additional functions such as flashing light and rear light. This ensures increased safety and visibility in various driving situations. This optional equipment allows every vehicle owner to customize the roof rack according to their own needs.

The LeTech roof rack only adds 65 mm to the overall height of the vehicle, so the offroad capability

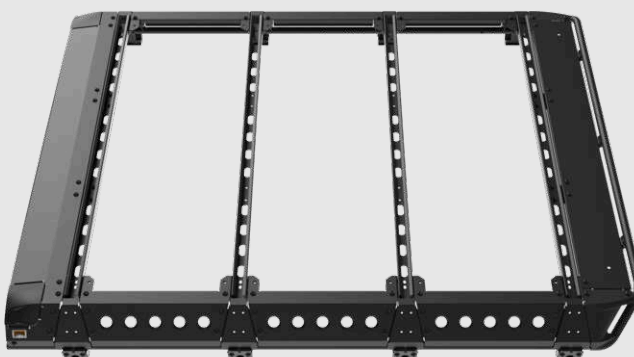

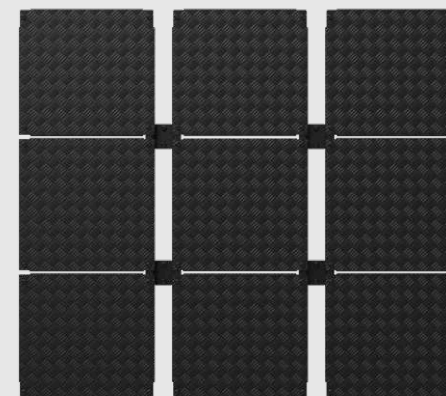

and flexibility of your vehicle is not compromised. With a weight of 43 kg (plus 18 kg for the planking), it offers a dynamic roof load of up to 100 kg, depending on the arrangement of the load. The static roof load can be up to 370 kg. The optional safari windows remain fully functional. Thanks to the closed design of the roof rack, wind noise is reduced to a minimum, ensuring a pleasant driving experience.

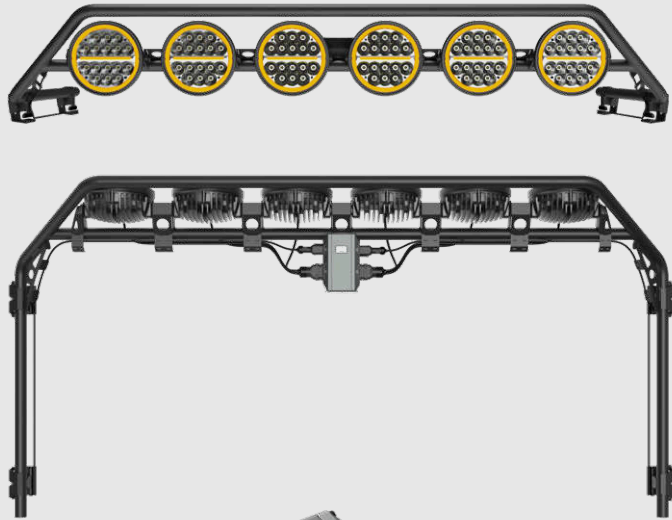

- LeTech roof rack Grenadier | Item no.: 11006
- LeTech planking for roof rack | Item no.: 11079
- LED multichamber work light rear | Item no.: 10940

LeTech headlight bracket for round headlights |

Item no.: 11014

LED round headlight 7" | Item no.: 10939

LeTech PCU | Item no.: 11361

---

To defy the darkness away from paved roads, a headlight bracket has been developed that provides a secure hold for the LED headlights even in challenging terrain. This gives you sufficient luminosity (57,600lm) to make even the remotest corners of the earth visible at night.

You have the choice between six round headlights (6x9,600lm) or the classic 50" LED lightbar (38,400lm).

Both versions are also available as kits, which are supplied pre-assembled and therefore offer simplified installation according to plug play.

The LeTech PCU is also available for the LeTech headlight bracket for round headlights. This is already included in the kit.

With the help of the LeTech PCU (PowerControlUnit) and the standard switches on the roof control unit, it is possible to switch between five pre-programmed lighting modes. This means that the lighting can be optimally adapted to any situation. With its anodized aluminium housing and laser-engraved LeTech logo, the PCU is not only functional, but also visually appealing.

# LETECH MULTIFUNCTION REAR LADDER

Access to the roof is made possible by the LeTech rear ladder, which also has a practical 20 liter canister holder and a ski holder (middle rung can be removed). The canister holder can optionally be used for a metal canister or water canister. The multifunctional rear ladder is supplied with a TÜV parts certificate.

Grenadier | Item no.: 10899

# LETECH OFFROAD RUNNING BOARD

Add the LeTech offroad running board to your Grenadier and experience enhanced functionality and aesthetics. Compared to the factory installed the LeTech Offroad running board provides more ground clearance and allows you a comfortable entry into your vehicle. The safe anti-slip embossing make it easier to access the roof rack. The offroad running board also features stainless steel mounting points for the High Jack. In addition, the running board pro-

ducts for the sensitive sill area of your vehicle during adventurous drives. The offroad running board is made of resistant fine-grained steel and finished with a KTL primer and a powder coating. This ensures reliable protection against corrosion and a long-lasting, highquality appearance, even under demanding conditions. The offroad running board is supplied with a TÜV parts certificate.

---

# LETECH WINCH ATTACHMENT

With the LeTech winch attachment, you are ideally equipped when traveling in the forest.

The winch unit, made of steel, replaces the plastic center piece. The cable winch is also easily accessible, quickly ready for use and has 27m of cable. Even if your Ineos Grenadier is equipped with a cable winch ex works, we can easily integrate it into our winch attachment using the LeTech adapter set. The LeTech winch attachment is supplied with a TÜV parts certificate and is certified with a pedestrian protection test by the Federal Highway Research Institute.

# LETECH WINCH COVER FOLDABLE

The foldable LeTech winch cover allows easy access to the cable winch without the need for tools. It is an attractive solution for concealing the cable winch when not in use. This cover also protects the cable winch from the effects of nature and impacts.

Its robust construction ensures reliable performance and durability, even in demanding terrain.

The LeTech winch cover comes with a TÜV parts certificate and is certified with a pedestrian protection test by the Federal Highway Research Institute.

# WHEELS & SUSPENSION

Discover the perfect combination of impressive off-road performance and outstanding road holding! The LeTech suspension for your Grenadier, developed in cooperation with Reiger/ KW Suspension, consists of four high-quality coil springs and four aluminum BigBore shock absorbers with cooling fins. These are equipped with technologies from motorsport and are 4-way adjustable (low-speed and high-speed rebound damping as well as low-speed and high-speed compression damping). These allow you to customize the suspension to your Grenadier. Raising the suspension by approx.

40mm also creates sufficient clearance for appropriate offroad wheels. The shock absorbers allow you to customize the suspension to your Grenadier.

The BRAID rims 8x17" Winrace S ET+45 are one-piece alloy wheels available in an anthracite finish. They offer the option of fitting 17-inch all-terrain and mud-terrain tires, which makes driving on demanding terrain easier.

# LETECH DRAWER BOX TRUNK

Your adventure begins with optimal order! Organize your cargo space with the LeTech drawer box! The LeTech drawer box is fixed to the loading floor and offers two spacious drawers (each 790x430x130 mm) with variably divisible drawer compartments. In addition, pieces of luggage can be

secured with the help of the fixed lashing rails on the top of the LeTech drawer box. This way, you can keep important travel items organized and within easy reach. In addition, the LeTech drawer box forms a flat surface with the folded down bench seat of your Grenadier.

# LETECH ROOF STORAGE COMPARTMENT TRUNK

The LeTech roof storage compartment for the Grenadier offers a practical way of creating additional storage space in the rear of your vehicle. Integrated into the silhouette of the trunk, it blends into the overall appearance and provides access to the storage space as soon as the rear door is opened.

The double locking system ensures that your belongings are stored securely and protects them from unauthorized access. In addition, the roof storage compartment complies with regulation no. 36.2.15 WaffVwV, which also makes it suitable for the transportation of hunting weapons (please observe all relevant regulations and laws).

Made from robust aluminum sheet metal parts and finished with a durable powder coating, the LeTech roof storage compartment offers a reliable solution for additional storage space in your Grenadier.
