**WHO
WE
ARE**

MADE IN GERMANY	At LETECH, we place a particularly high value on quality. We manufacture our products in our own factory in Welzheim using modern technology and Swabian thoroughness.
CERTIFICATED MANUFACTURING	Expertise with a letter, seal and certificate: Since 2016, our company LETECH GmbH & Co. KG has been certified in accordance with the ISO 9001:2015 quality management standard.
FAMILY DRIVEN SINCE 2009	For us, family business means cultivating a certain corporate culture in which not only employees but also customers and business partners have become good friends and thus part of the LETECH family.

The LETECH roof rack offers an elegant solution for transporting heavy roof loads as well as easy installation of roof tents and awnings. The four c-rails of the LETECH roof rack offer individual mounting options and allow flexible width adjustment by projecting over the side rails. The LETECH roof rack only adds 65 mm to the overall height of the vehicle, so the offroad capability and flexibility of your vehicle is not compromised. With a weight of 43 kg (plus 18 kg for the planking), it offers a dynamic roof load of up to 100 kg, depending on the arrangement of the load. The static roof load can be up to 370 kg. The optional safari windows remain fully functional. Thanks to the closed design of the roof rack, wind noise is reduced to a minimum, ensuring a pleasant driving experience.

LETECH ROOF RACK PRO

The LETECH PRO Roof Rack combines the functionality of the LETECH roof rack with integrated periphery lighting. Four additional spotlights on the side panels of the Station Wagon and two on the Quatermaster provide wide-area illumination of the vehicle's surroundings in the dark.

The powerful Strands Firefly Scene Lights, with 2,000 lumens, improve visibility and working conditions during nighttime operations and prove to be a practical feature while traveling—whether you're loading or unloading, setting up camp, or spending time around the vehicle.

LETECH HEADLIGHT BRACKET

ROUND HEADLIGHTS IN 6X VERSION (6 X 9,600 LM)

To defy the darkness away from paved roads, a headlight bracket kit has been developed that provides a secure hold for the LED headlights even in challenging terrain. It has sufficient light output (57,600 lm) to make even the remotest corners of the earth visible at night.

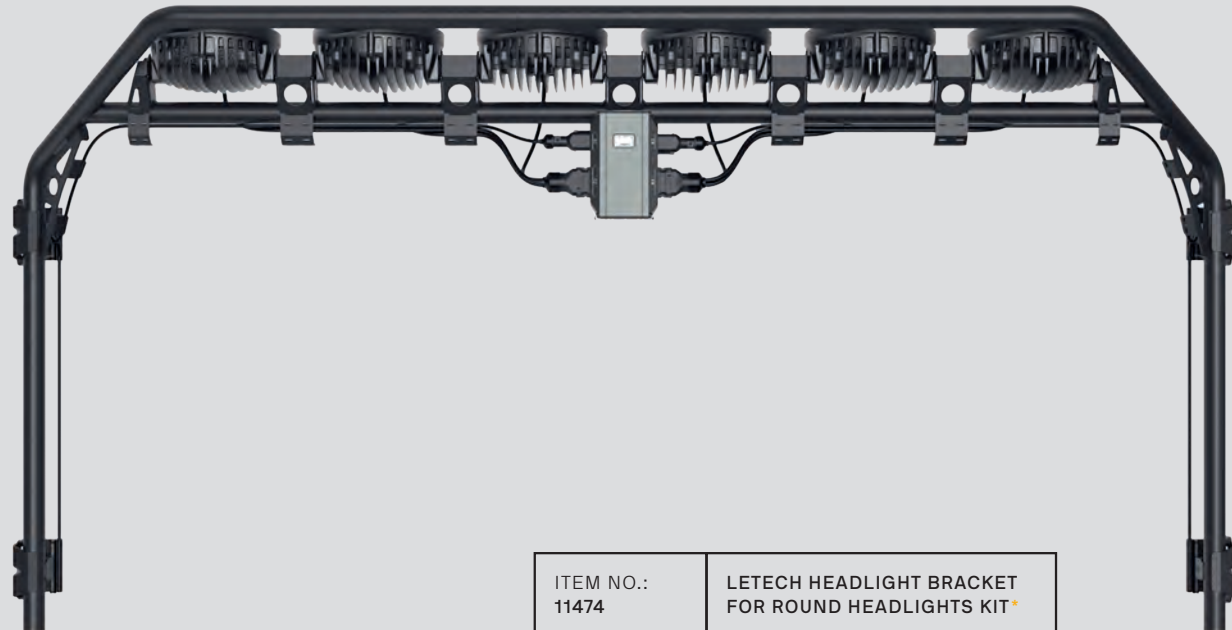

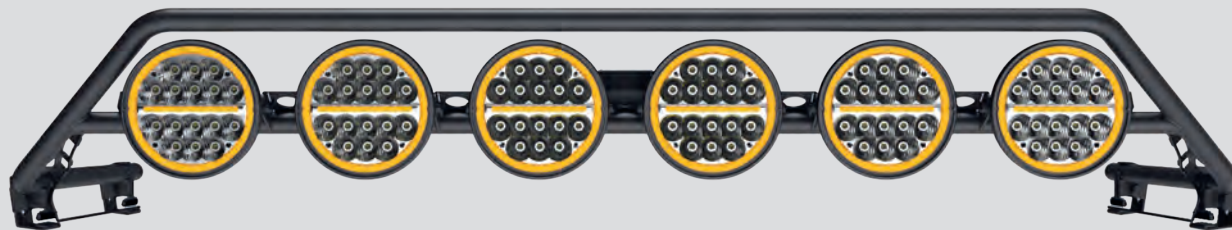

CLASSICAL 50" LED LIGHTBAR (38,400 LM)

The LETECH headlight bracket kit is also available with the LED lightbar (38,400 lm). Both versions are available as a kit which are supplied pre-assembled and therefore offer simplified installation according to plug and play.

ITEM NO.:
11474

LETECH HEADLIGHT BRACKET
FOR ROUND HEADLIGHTS KIT*

With the LETECH PCU (PowerControlUnit) and the standard switches on the roof control unit, it is possible to switch between five pre-programmed lighting modes. This means that the lighting can be optimally adapted to any situation. With its anodised aluminium housing and laser-engraved LETECH logo, the PCU is not only functional but also visually appealing. The LETECH PCU is already included in the headlight bracket kit for round headlights.

ITEM NO.:

Add the LETECH offroad running board to your Grenadier and experience enhanced functionality and aesthetics.

Compared to the factory installed side steps the LETECH offroad running board provides more ground clearance and allows you a comfortable entry into your vehicle. The safe anti-slip embossing make it easier to access the roof rack. The offroad running board also features stainless steel mounting points for the Hi-Jack.

In addition, the running board protects for the sensitive sill area of your vehicle during adventurous drives. The offroad running board is made of resistant fine-grained steel, hot-dip galvanized and powder coated. This ensures reliable protection against corrosion and a long-lasting, high-quality appearance, even under demanding conditions.

The offroad running board is supplied with a TÜV parts certificate.

*also available for INEOS Grenadier Station Wagon

LETECH WINCH ATTACHMENT

With the LETECH winch attachment you are well equipped for traveling or adventures in the forest. The steel welded assembly replaces the center piece, which is otherwise made of plastic. The winch attachment is also easily accessible, quickly ready for use and has 27 metres of cable. Even if your INEOS Grenadier is equipped with a cable winch ex works, we can easily integrate it into our cable winch attachment using the LETECH adapter set. The LETECH winch attachment is supplied with a TÜV parts certificate and is certified with a pedestrian protection test by the Federal Highway Research Institute. A heavy-duty version is available for export markets, featuring a 5-mm steel cover instead of the standard aluminum cover for even greater stability.

WHEELS AND SUSPENSION

Discover the perfect combination of impressive offroad performance and outstanding road holding! The LETECH suspension for your Grenadier, developed in cooperation with Reiger/ KW suspension consists of four high-quality coil springs and four aluminum BigBore shock absorbers with reservoirs. These are equipped with technologies from motorsport, and are 4-way adjustable (low-speed and high-speed rebound damping as well as low-speed and high-speed compression damping). This allows you to customize the suspension to your Grenadier. The elevation by approx. 40 mm also creates sufficient clearance for appropriate offroad wheels.

The BRAID rims 8x17" Winrace S ET+45 are one-piece alloy wheels available in an anthracite finish. They offer the option of fitting 17-inch all-terrain and mud-terrain tyres, which makes driving on demanding terrain easier.

LETECH SUSPENSION SPRINGS
LOWER*

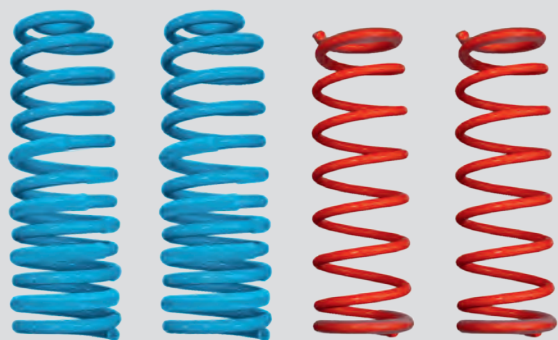

The LETECH lowering springs were developed in collaboration with KW automotive GmbH and enable a lowering of 60 mm, so that the Grenadier achieves an overall height of less than 2 metres. The springs are plastic-coated in green.

The LETECH tacho module corrects the speedometer deviation due to larger tyres (285/75-R17) and ensures that your speedometer shows the correct speed again.

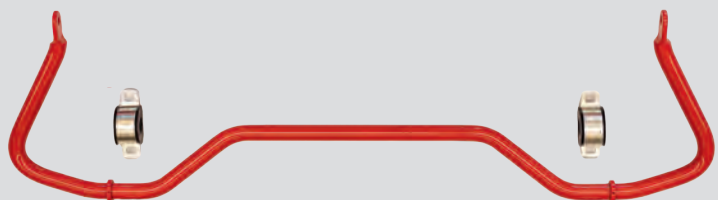

LETECH PAYLOAD-INCREASE KIT

**FOUR ALUMINIUM BIGBORE
SHOCK ABSORBERS**

**FOUR REINFORCED
COIL SPRINGS**

REINFORCED STABILIZER BAR

The LETECH Payload-Increase Kit allows you to increase the permissible gross vehicle weight of your INEOS Grenadier to 4.2 tonnes.

The 4-way adjustable aluminium BigBore shock absorbers allow for individual suspension tuning.

The coil springs provide a 40mm lift. The rear axle springs are additionally reinforced and specifically designed for heavy loads.

The reinforced, red powder-coated stabilizer bar completes the system and ensures greater driving stability, safety and control, even when fully loaded.

ITEM NO.:
13148

LETECH PAYLOAD-INCREASE KIT*

LETECH PORTAL AXLES

MAXIMUM OFFROAD
CAPABILITIES

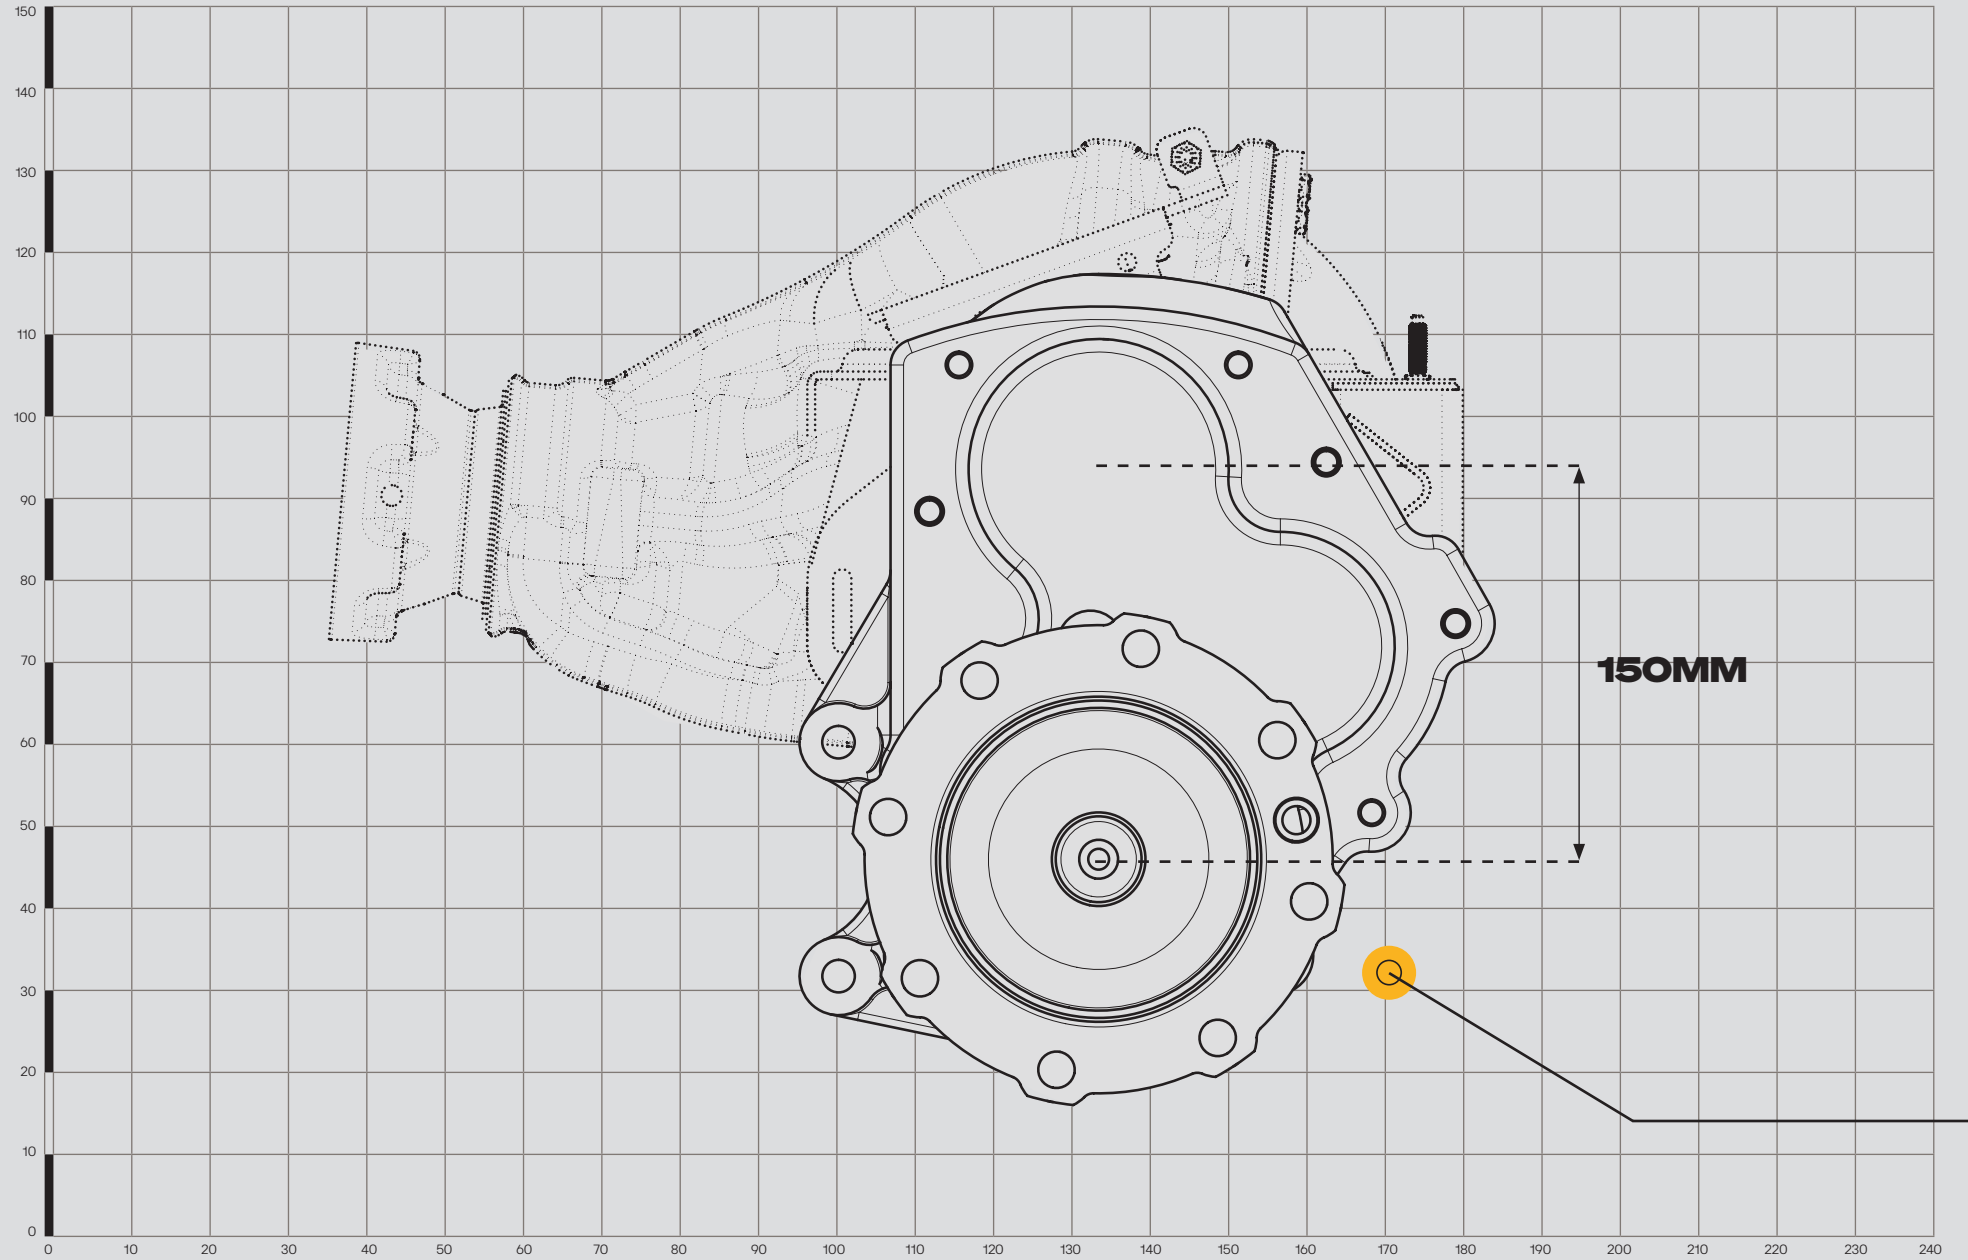

LETECH portal axles are renowned worldwide for their outstanding off-road capabilities and reliability. They are fitted to various model years and variants of the INEOS Grenadier and set the benchmark for off-road performance.

By increasing ground clearance by approximately 186 mm, LETECH portal axles enable the vehicle to tackle even the most challenging terrain with confidence. The gearbox housing in the wheel hub area creates an axle offset of 150 mm, which allows for the fitting of significantly larger wheels, thereby further optimising off-road capability. The raised axle bridge increases the clearance between the driven wheels, enabling obstacles to be safely negotiated even in the most challenging terrain.

In combination with the Central Tyre Inflation System (CTIS), drivers benefit from enhanced ride comfort on rough roads and in situations where maximum traction is required (snow, sand, mud), as the tyre pressure can be conveniently adjusted whilst driving. The portal axles are manufactured using state-of-the-art technology in our own production facilities, which guarantees the highest precision and quality.

LETECH DRAWER BOX TRUNK ACCESSORIES

Your adventure begins with optimal order!

Organize your cargo space with the LETECH drawer box! The LETECH drawer box is fixed to the loading floor and offers two spacious drawers (each 790 x 430 x 130 mm) with variably divisible drawer compartments. In addition, pieces of luggage can be secured with the help of the fixed lashing rails on the top of the LETECH drawer box. This way, you can keep important travel items organized and within easy reach. In addition, the LETECH drawer box forms a flat surface with the folded down bench seat of your Grenadier.

TOOL RANGE IN A CASE

LETECH DRAWER BOX TRUNK ACCESSORIES

The dog ladder from LETECH is the ideal solution to make it easier for your dog to get into the trunk.

It can be quickly and easily integrated into the LETECH drawer box - as an additional drawer that can be replaced with the normal drawer if required. The advantage: when travelling without your dog, you can reinstall the normal drawer and leave the drawer with the dog ramp at home. The pre-assembled ramp can be extended effortlessly and offers your dog a stable, non-slip surface for easy access to the trunk. The LETECH dog ladder is not only practical, but also multifunctional: when folded up, it can easily be used as a small table. Robust, easy to use and perfect for dog owners who spend a lot of time travelling.

ITEM NO.:
12267

LETECH DOG LADDER

LETECH CARGO AREA STORAGE BOXES

Organise the load area of your INEOS Grenadier Quartermaster with LETECH's waterproof storage boxes.

The LETECH storage boxes are securely bolted directly to the load floor and provide additional storage space in the load area.

They are waterproof and lockable.

The left and right sides of the load area are available separately.

ITEM NO.: 11384(LE), 11385(RI)	LETECH CARGO AREA STORAGE BOXES
-----------------------------------	------------------------------------

LETECH ROOF STORAGE COMPARTMENT TRUNK

The LETECH roof storage compartment for the Grenadier offers a practical way of creating additional storage space in the rear of your vehicle. Integrated into the silhouette of the trunk, it blends into the overall appearance and provides access to the storage space as soon as the rear door is opened.

The double locking system ensures that your belongings are stored securely and protects them from unauthorized access. In addition, the roof storage compartment complies with regulation no. 36.2.15 WaffVwV, which also makes it suitable for the transportation of hunting weapons (please observe all relevant regulations and laws). Manufactured from robust aluminum sheet metal parts and finished with a durable powder coating, the LETECH roof storage compartment offers a reliable solution for additional storage space in your Grenadier.

ITEM NO.:
11541

LETECH ROOF STORAGE
COMPARTMENT TRUNK

LETECH PHONE HOLDER

The LETECH mobile phone holder offers a practical way to securely mount your mobile phone whilst driving. Even when subjected to strong vibrations in rough terrain, the smartphone remains firmly in place. Ideal for navigation, off-road tracking or communication whilst on the move. It is attached to the vehicle's existing bolt-on mounting points, allowing for simple and precise installation. It features a mount for compatible adaptors, such as those from SP Connect or Quad Lock. The adaptors are available separately. In addition, the mobile phone holder features a handy compartment for storing small tool pouches.
